

# 100% NATURAL INSECTICIDE AND ACARICIDE

## INSECT ELIMINATOR

READY TO USE  
LEAVE THEM  
NO CHANGE!  
OR CONCENTRATED

### Insect Eliminator

Available in concentrated or ready-to-use version, Insect Eliminator can be used by spraying or misting in the rooms to be treated and inside the house (on wood, terraces, cupboards, walls, floors, etc.) and inside farm buildings.

Insect Eliminator contains plant extracts that eliminate and get rid of flying and crawling insects. It is a biodegradable product that is harmless for humans and domestic pets as it contains neither pyrethroids nor synthesis pesticides.

The dual insecticide and repellent properties of Insect Eliminator treat and prevent the return of most crawling and flying insects - thrips, mites, etc. - as well as flies, mosquitoes, wasps, cockroaches, moths, bugs, ants, fleas, weevils, termites, red spiders, etc.

Insect Eliminator starts with a repellent phase before its chitin (scale) degradation action causes gradual drying out and rapid death of insects and mites, at all biological stages (eggs, larvae and adults).

The special action process of Insect Eliminator is totally different from other insecticides. It causes no resistance trait unlike the organophosphorous insecticides or pyrethroids.

#### Use:

Ready-to-use Insect Eliminator: Shake the flask before use.

Concentrated Insect Eliminator: Shake the flask before use.

Application dilution: dilute 3% in water.

#### Application:

As soon as harmful insects appear and as a preventive measure: Spray on floors, walls, ceiling, cracks, door frames, pots, plastics, etc. once a week until they disappear completely. Store the product at room temperature.

#### Storage and precautions for use:

Contains Geraniol. May trigger an allergic reaction. Clean the equipment with water.

- *Very wide range of activity*
- *Prolonged action*
- *Very safe to use*
- *No negative impact on the environment*
- *100% natural, non-toxic formula*

Insect Eliminator is an anti-parasite insecticide, miticide and repellent as defined in the biocide product regulations (classes PT18 and PT19) that can be used against such arthropods as insects, spiders and crustacea.

#### Insect Eliminator

Liquid solution - Contains:  
Geraniol (CAS no. 106-24-1)  
- 9 g/kg

#### Insect Eliminator concentré

Liquid concentrate - Contains:  
Geraniol (CAS no. 106-24-1)  
- 300 g/kg

**DO NOT APPLY INSECT ELIMINATOR DIRECTLY ON TO PLANTS. USE ONLY TO TREAT THE SURROUNDING AREAS**
