## Massive Bloom

MASSIVE BLOOM is a high-quality stimulating fertilizer and flowering accelerator, the result of scientific research and laboratory tests, which offers amateur and professional gardeners a product with unbeatable power. The MASSIVE BLOOM formulation is a knowledgeable blend of major P/K elements of the highest possible quality, extra purified and highly assimilable, which we have combined with natural marine trace elements, bio stimulant additives and numerous vitamins to produce a very effective organo-mineral synergy.

Designed to increase yield and develop active substances and essential oils, this unique, new-generation formula provides plants with extra energy and vitality for massive bud development.

MASSIVE BLOOM speeds up flowers appearing and flowering whilst remaining very easy to use in conjunction with a balanced nutritive programme. Save time and increase your production thanks to MASSIVE BLOOM, a product specially formulated to stimulate exceptional flowering.

Our exclusive formulation contains:

- A seawater extract to input previous minerals and

trace elements. It is a tonic, revitalising nutritional supplement based on magnesium-rich seawater (2300 mg/l). The numerous mineral salts and trace elements included in its make-up turn this seawater plasma into a particularly revitalising hypertonic product. Main ingredients are magnesium, calcium, sulphur, potassium, fluorine, phosphorus, iodine and sodium.

- An extract of Spiruline, a seaweed well known for its bio-stimulant and anti-oxidant properties and as an excellent source of vitamins (A, E, D, B1, B2, B3, B6, B7, B8, B12, K), beta carotene and minerals and trace elements like calcium, phosphorous, potassium, magnesium, iron, copper, zinc, manganese, chromium, sodium and selenium. Rich in the powerful anti-oxidant phycocyanine, chlorophyll and enzymes, of which the most significant is superoxide dismutase (SOD) which contains iron.

- L-ascorbic acid (vitamin C), which is very beneficial for the plants. A crucial co-enzyme in degradation reactions, which prevents an accumulation of undesirable compounds producing a bad taste. Vitamin C is the main element responsible for changing flavours and aromas.

- **To increase the volume of flowers and fruit**
- **Ultra-soluble formulation specific for flowering**
- **Contains extracts of seawater and spirulina**
- **Enriched with vitamin C**
- **Economical: 100 g = +300 litres of nutritive solution**

### Suitable for

- ✓ Cultivation in soil
- ✓ Hydroponics
- ✓ Aeroponics
- ✗ Foliar spray

### Period of use

- ✗ Seeds/Cuttings
- ✗ Growing period
- ✓ Pre-flowering
- ✓ Flowering

### Composition

- 50% Phosphoric anhydride (P2O5), water-soluble.
- 33% Potassium oxide (K2O), water-soluble.
- Extract of Spirulina.
- L-ascorbic acid (Vitamin C).
- Extract of sea water.

### EC FERTILIZER - PK 50-33
