## XtraRoots

XtraRoots is a product with an exclusive formulation based on a combination of highly-assimilable chelated iron (DTPA) and organic substances (plant extracts, marine algae, organic acids). The complex has many rare compounds that are especially effective for the massive development of healthy roots and unbelievable plant growth.

XtraRoots has special nutrients, providing considerable energy and optimising activation of natural defences. These elements act on the physiological functions of the plant by optimising hydric and mineral absorption and encouraging exacerbated development of root-hairs and roots.

XtraRoots provides a tremendous number of compounds: polysaccharides, homofucans, stable polyphenolic complexes, pure extract of humic (2%) and fulvic (1%) acids, amino acids and vitamins (C, B1). A cocktail of substances which act in total synergy for rapid and vigorous root growth.

### Application:

Use XtraRoots as a leaf spray before the roots appear and as a supplement to the nutritive solution at the first sign of rooting. For strong, accelerated plant growth, use XtraRoots throughout the growth period until the end of the pre-flowering phase.

- With each preparation or nutritive solution supplement, in addition to the normal nutritive programme.

### Dose rates:

Before roots appear: Dilute 0.25 to 0.50 ml of XtraRoots in one litre of water at ambient temperature and apply once using a sprayer.

After roots appear: Add 2.5 to 5 ml of XtraRoots to 10 L of nutritive solution. Use in addition to your normal nutritive programme until the end of the growing period.

- **New exclusive formulation.**
- **Extremely high-quality formulation.**
- **Contains selected amino acids.**
- **Enriched with vitamin C, B1.**
- **Plant extracts, extract of marine algae.**
- **PURE extract of humic (2%) and fulvic (1%) acids.**

### Suitable for

- ✓ Cultivation in soil
- ✓ Hydroponics
- ✓ Aeroponics
- ✓ Foliar spray

### Period of use

- ✓ Seeds/Cuttings
- ✓ Growing period
- ✓ Pre-flowering
- ✗ Flowering

### Composition

FERTILISER NF U 42-002-2  
CHELATED IRON (DTPA)

- 0.25% water-soluble iron (Fe), chelated by DTPA
- Amino acids: Total free amino acids (of short length): 1% (glycine, valine, proline, hydroxyproline, alanine, aspartic acid, arginine, glutamic acid, lysine, leucine, isoleucine, phenylalanine, methionine, serine, asparagine, threonine, cysteine, tyrosine, histidine, tryptophan and glutamine)
- Vitamin B1: 0,3%
- Plant extracts: 42%, including 10% seaweed extracts
- Humiques acid: 2,7%
- Fulviques acid: 0,5%
- pH: about 7.5
- density: about 1.09
